## **DETAILED ACTION**

### ***Election/Restrictions***

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I: Claims 1-21 and 44 drawn to an image forming apparatus with spacer having a length in the longitudinal direction thereof greater than that of the image forming member in the same longitudinal direction, each longitudinal end of the spacer being arranged between the inner periphery of the support frame and a line through which passes an end of the conductive film positioned in a side-by-side opposing relation to the outer periphery of the image forming member, wherein the line is substantially perpendicular to the principal surface of the second substrate.

Species II: Claims 22-43 and 45 drawn to an image forming apparatus with a second conductive film connecting the first conductive film to the image forming member.

Species III Claim 46 drawn to an image forming apparatus with spacer having a length in the longitudinal direction thereof greater than that of the image forming member in the same longitudinal direction, each longitudinal end of the spacer being arranged between the inner periphery of the support frame and a respective plane through which a corresponding end of the conductive film extends, wherein each respective plane extends substantially perpendicularly to the principal surface of the second substrate.

Art Unit: 2879

Species IV Claims 47-58 drawn to an image forming apparatus wherein the second conductive film is in the form of a closed loop.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is held generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 2879

A telephone call was made to Frank A. Delucia on 11/21/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
